

*Being responsible for activation of all available resources and creation of conditions for improvement of environment quality, ENERGO-PET adopts the*

## **POLICY OF ENVIRONMENTAL PROTECTION**

*Policy of environmental protection of ENERGO-PET is the integral part of the business policy and is based on observance of law, regulations and ISO 14001 standard, demands of all interested parties as well as good production and hygienic practice.*

*ENERGO-PET is dedicated to protection of environment and is aware of importance that the environmental protection should have in the management of ENERGO-PET and in their everyday activities.*

**Basic principles** of environmental protection are:

- 1. Priority task of each manager from the aspect of environmental protection is to satisfy requirements and expectations of laws, owners, environment and society as a whole,*
- 2. Improvement of the environmental protection system and prevention of pollution,*
- 3. Consistent application of this policy with the aim of the environmental protection and sustainable development as well as broadening of awareness of the need,*
- 4. Open communication with environment with the aim of permanent spread of environment protection culture.*

*With the aim of observance of these principles, we oblige to achieve the following **general objectives**:*

- 1. Constantly update the identification of all environmental aspects;*
- 2. Constantly monitor the performance of environmental protection activities, by setting and reviewing the fulfillment of specific environmental goals;*
- 3. Constantly work on improvement of appearance and quality of work environment;*
- 4. Use resources and energy in a sustainable and responsible way, reduce the environmental risks;*
- 5. Dedicate special attention to sorting, recycling of waste and reducing of waste;*
- 6. For each investment and purchase of new equipment, create plans and define possible dangerous situations and harmful effects on employees and the environment;*
- 7. Constantly work on spreading awareness, motivation and stimulation of all interested parties on environmental protection;*
- 8. Constantly improve, educate and inform employees and business partners about the impact of business and the need for environmental protection.*
- 9. Follow up and support international initiatives for environmental protection (Zero Pellet Loss)

*Management of ENERGO-PET takes care that policy of environmental protection is available and explained to everyone in Company and in the surroundings. Policy of environmental protection is reconsidered at least once annually in order to redefine the effectiveness of environmental protection objectives.*
